Education

- Rutgers University, pursuing a Bachelor's Degree in Computers Science with a minor in Business Administration
- Dean's List, GPA: 3.8

Experience

June 2023 - Today

Personal Project, Algorithm Day-Trading Bot

- Engineered algorithms capable of comprehensive market evaluation, trade execution, and seamless integration with our chosen broker's functionality.
- Implemented sophisticated Technical Analysis algorithms using Pinescript, facilitating the generation of HTTP webhook alerts to our Python-based AWS server program for communication with the broker API.
- Successfully developed, fine-tuned, and rigorously tested two pivotal Pinescript automated trading strategies based around ICT Silver Bullet and Lorentzian Classification frameworks.

May 2022 - July 2022

NightStar Partners, Remote – *Software Development Intern*

- Engaged with NightStar Partners, a distinguished Microsoft Gold Partner company, contributing to software development initiatives.
- Collaborated remotely with the offshore development team, gaining hands-on experience in C++ programming.
- Actively participated in virtual business meetings and customer interactions, showcasing adept communication and collaboration skills.
- Demonstrated a proactive approach by attending IAMCP (International Association of Microsoft Channel Partners) meetings, further enhancing industry knowledge and networking within the company.

September 2021 - February 2022

CVS, Parsippany NJ – *Retail Store Associate*

- Developed vital social skills for the workplace, emphasizing responsibility and task completion.
- Gained invaluable insights into the significance of responsibility and time management, effectively juggling multiple tasks and delivering results in a timely manner.

Skills

Java, Python, C, C++, Data Structures, HTML), HTTP Requests, AWS, PineScript, Unix/Linux
